OUR COLLIERY SONG

"Levoyi Chelikada"

TELUGU VERSION	ENGLISH TRANSLATION
Levoyi chelikada ma ganee panivada Mana thalli bhoodevi karuninchi navvindi Ee navodayavela boggugani pilachindi.	O ! Fellow-worker Awake. Yet a New Mine is opened to usher a New Era. Get up from your slumber to see our cheerful Mother Singareni.
Hey! Levoyi chelikada levoyee ma ganee panivada raavoyee	
Mana bhoomilo meti boggunidhulundaga Mana vontilo jathi rakthamupponga aakasha veedhilo thelimabbuladaga Sakthantha choopinchi boggantha thravvara Levoyi chelikada levoyee ma ganee panivada raavoyee.	Nowhere in the South do we find the rich deposits of Coal – the power for any machine.
Mana boggu meedane mana vooru mana peru Yennenno revulaku yegumathee cheyali Inapagajjela thalli neggatti tharamali Mana peru lokala marmrogi povali Levoyi chelikada levoyee ma ganee panivada raavoyee.	Our hearts are full of national pride to know our Land is gifted with Coal. Take out the hidden treasure and reach it to every one. Our name should spread to the four corners. Fellows, gird up your loins.
Yevari badhyatha varu chakkaga gurthisthe Shrama pettubadulaku bhedamemundoyi Chemati neetiki nedu ghanamina gouravam Dakkinchu chattalu mana anda nunnayi.	If all realise and do their duties, where is the difference between Capital and Labour ? Labour has an honoured place and is well looked after.
Tharavvara patupadi rathnala yee garbha Yentha thravvina gani tharagavee sirulu Yentha thravvithe antha Shreelakshmi natyale Nee inti vakilla muthyala muggule Levoyi chelikada levoyee levoyee levoyee raavoyee!	Take out the inexhaustible Treasures by digging deep into the ground - - the more you dig the greater are the riches. O ! Friend our house is blessed with Smiles.

(THIS WEEK'S STORY)

EVIL BEGETS EVIL

Once a dog and a cock were friends. They wanted to go on a journey and see many places. One day they started on their journey and the dog took the cock on his back. Evening came when they were going through a forest. So the cock said, "Let us stop here for the night and go on our way in the morning."

"Yes, we shall do so," said the dog. "See that tall tree before us. You sit on one of the branches and I shall sleep, at the foot of the tree."

They came to the tree, and there was a hole at the foot of the tree. The cock flew up to one of the branches and the dog lay down in the hole.

In the morning the cock crew. A fox lived near the tree. The fox heard this and got up. He thought, "The cock is good to eat! This is a good day for me! He went to the cock and said, "How pretty you are! What a sweet voice! Please come down and let us be friendly."

The cock was not a fool and he understood the plan of the clever fox. So he said, "My friend, I thank you for your good words. I will come down soon. But there is my friend at the foot of the tree. Wake him up first."

The dog got up by this time.

So when the fox came near, he fell on him and killed him.

EVIL COMES TO HIM WHO PLANS EVIL.

THOUGHT FOR THE WEEK

Money may buy the husk of many things, but cannot buy the kernál. It brings you food but not the appetite, medicine but not the health, acquaintance but not friends, servants but not faithfulness, days of joy but not peace or happiness.

-Henrik Ibsen.

THE CLOCK THAT THOUGHT

Once a philosophical clock fell to meditating upon the future as it was put in its place for the first time. It reasoned that since it had to tick twice each second, 120 times a minute or 7,200 every hour, in 24 hours it would complete 172,800 ticks.

This meant 63,072,000 times every year, calculated the clock, and in ten years it would have to tick 630,720,000 times.

At this point it collapsed from nervous exhaustion. When revived it saw in a moment of insight that all it had to do was one tick at a time. So it began. Now, after 100 years it is a respected grandfather clock.

It behoves us all to apply to our job the lesson learned by the clock.

FIRST we should analyse each job assignment. What is the objective? What needs to be done .... why ..... when ..... and who should do it?

SECOND plan the sequence of operation, first things first, such as, who is to do certain jobs and what safe working practices are needed for that particular job.

Of course, no plan is better than the judgement that goes with it. One way to develop judgement is to recognise one's mistakes and apply the lessons to future decisions.

Often, we know better, yet we indulge in many unsafe practices which, if not corrected, will result in injury and suffering to others and us.

Planning demands initiative, imagination, resourcefulness, and a careful follow-up. Then it pays dividends in a job well done.

After all, our job is like the clock's job, a lot of ticks, but only one at a time.

SAFETY FIRST

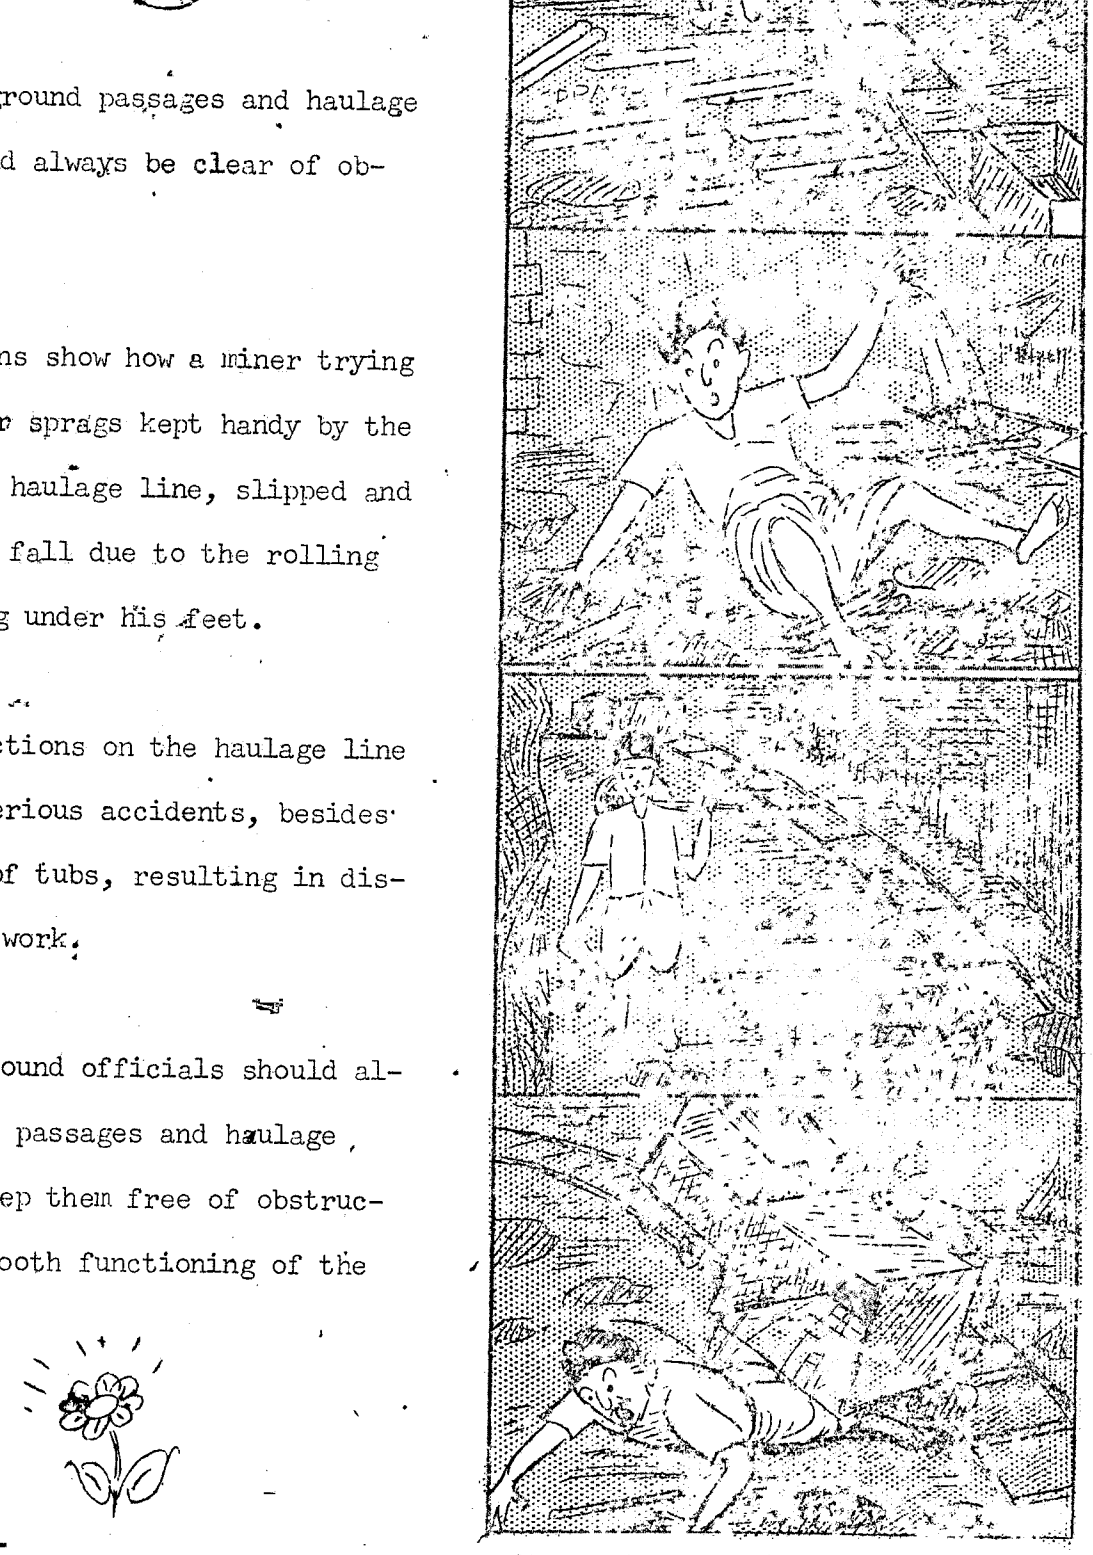
(20)

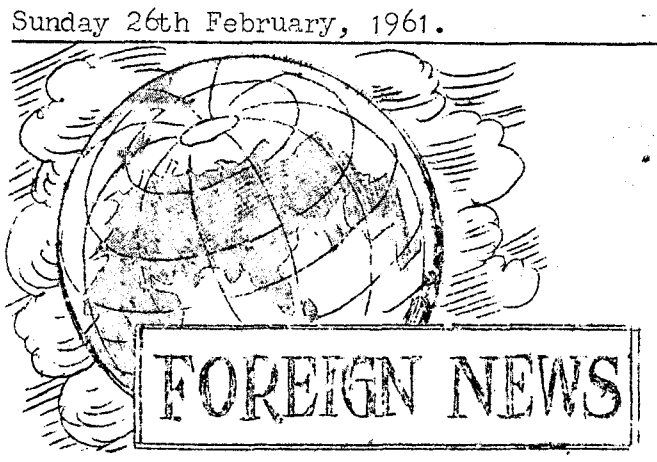
Underground passages and haulage lines should always be clear of obstructions.

Cartoons show how a miner trying to step over srags kept handy by the side of the haulage line, slipped and had a nasty fall due to the rolling of the sprag under his feet.

Obstructions on the haulage line can cause serious accidents, besides derailment of tubs, resulting in dislocation of work.

Underground officials should always inspect passages and haulage lines and keep them free of obstructions for smooth functioning of the work.





Russia launches rocket on flight to Venus

Russia on Feb.12 launched a rocket called "an inter-planetary station" in the direction of the planet Venus, Tass announced on the night of Feb.12.

Tass said the rocket was due to reach the region of Venus in the second half of May.

The weight of the inter-planetary station is 643.5 kilogrammes (about 1,420 lb.)

"The main object of the probe is to check the methods of injecting a space body into an inter-planetary trajectory, to check radio communications over long distances and the guiding of space station, to check more exactly the size of the solar system and to carry out a programme of physical observations in outer space."

Nuclear fall-out shelters

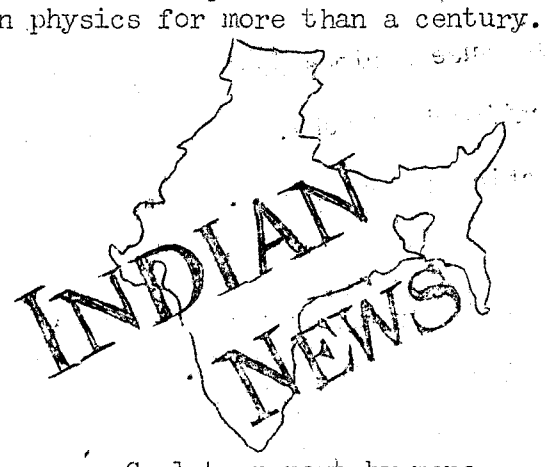
A new housing estate in California near Hollywood has a nuclear fall-out shelter in every home.

Each shelter, which costs 1,300 dollars is 10 feet square with walls of concrete blocks six inches thick and a six-inch thick concrete ceiling topped by 19 inches of earth under the garage. Air is pumped in through a filter designed to remove radio-activity matter.

The builder of the estate, Mr. Lou Towne said: "What with conditions the way they are, we felt somebody should start doing something in this country. From now on every home we build is going to have a shelter in it."

New type of refrigerator

An entirely new type of refrigerator has been demonstrated in Stockholm by A.B.Electrolux. It has no moving parts, will last indefinitely and needs no servicing. The model being shown is small-capacity less than three-quarters of a cubic foot-and is intended for campers, yachtsmen and car owners. The only sources of power needed is a car battery, from which the refrigerator takes between 25 and 30 watts, which is considerably less than the power consumption of the lighting system of an ordinary family car. The principle is that when two dissimilar metals are joined at each end and a current is made to pass in one direction round the circuit, then one junction is warmed and the other cooled. This phenomena has been known in physics for more than a century.



Coal transport by monorail. Govt.'s plans

The plan for a network of monorail in the Raniganj-Jharia coal belt of India for the movement of coal is receiving the serious attention of the authorities, it is reliably learnt at Calcutta.

The proposed monorail system is intended to carry, for the present, coal from the washeries in the West Bengal, Bihar coalfields to the five steel plants.

The objective of this proposed innovation in the transport system is to lighten the load on the railway wagons which have failed to keep pace with the mounting needs of the country in respect of the movement of coal.

The Railway Board, in the course of informal talks, has welcomed the proposal rather than opposing it as a competition to the railways.

Two considerations that seem to have weighed with the Board are that the management of the monorails is likely to be given to it; and secondly the railways have now more freight than it can handle. It is expected to go up as the Plans progress, so that the monorails will not cause any net loss of revenue. At the same time it is felt, it will help diverting the criticism that the railways have bungled in the allotment of wagons for coal.

The monorails, with no yard and no signal, will definitely be the fastest transport for coal, a knowledgeble source closely associated with the scheme said.

If the scheme, which seeks to revolutionise the transport of coal in India and ensure a steady supply of coal for the steel plants, is finally accepted by the Planning Commission with necessary priority in the Third Plan, its construction should start with the beginning of the Plan and completed by the middle of 1963.

The whole monorail idea was born, when arrangements were being finalised for the setting up of ropeways by the Coal Board for carrying sand to the collieries for purposes of sand stowing of worked up pits.

If rope ways can carry sands, monorails not radically different, may well carry coal, it is argued and the idea so born, has fast been snowballing into an active proposition.

Coal-washing capacity to be increased. Plans to raise output

The additional coal-washing capacity proposed to be created in the Third Plan may be raised from 10.5 million tons to 13 million tons.

The existing washery programme contemplated is part of a larger effort now being made to ensure that coal is produced in both adequate quantities & quality during the Third Plan period.

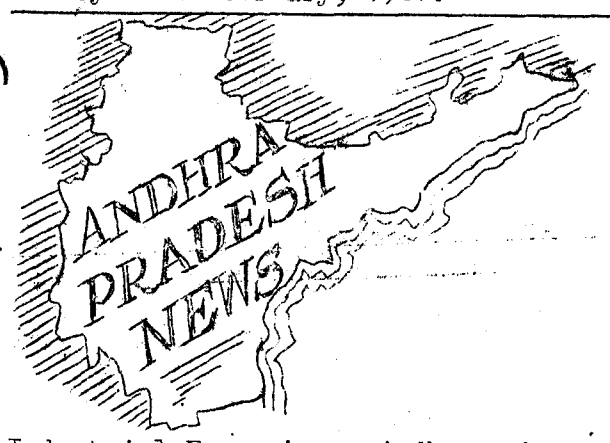
Coal production as a whole is proposed to be increased from the target of 60 million tons in 1961 to 97 million tons by 1966.

Rs.12,000 for meritorious service given as awards

In 1959-60 a sum of Rs. 12,000 was awarded to individual railwaymen who had made useful inventions and suggestions, said Shri Jagjivan Ram.

In presenting his Budget proposals, the Railway Minister stated that individual or collective awards in cash or in other forms were being given to railway employees for displaying exceptional merit in the discharge of their duties. Outstanding performances in marshalling yard and transhipment points improved outturn in workshops, lower incidence of accidents, cleanliness in the upkeep of station premises earned them such awards.

Extra set of travel passes, shields and collective cash prizes for utilisation on schemes of welfare were also being given to the staff in appreciation of meritorious records.



Industrial Expansion. Andhra schemes for Third Plan

Coal production in the State-controlled Singareni Group of Collieries will be up by 230 per cent., reaching an annual output of six million tons by 1966.

This was a highlight of an ambitious programme of industrial expansion, both in the public and private sectors, in the State's Third Plan outlined by Mr.Ranga Reddi, the State's Minister for Planning on February 15.

Mr.Reddy, in a broadcast from AIR, Hyderabad, also disclosed the incentives that his Government proposed to give to attract entrepreneurs from all over the country to help industrialise the State.

The expansion envisaged and the new industries proposed cover a wide range: fertilizer plants, paper mills, a drugs factory, leather industry etc.

Mr.Reddy said that Union Government had assured the State Government an amount of Rs.12.5 crores to help Singareni expand its capacity. The amount would be increased if deep mining was introduced.

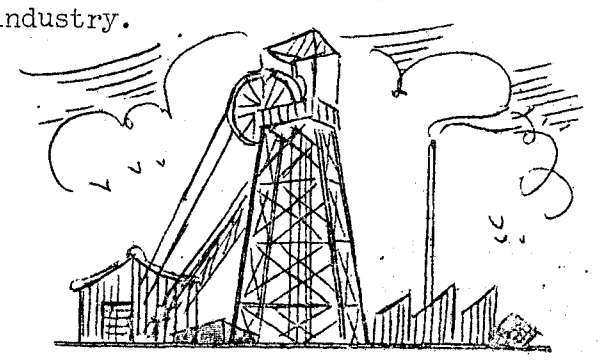
He said the State had worked out a blue-print for a low temperature carbonisation plant for better utilisation of the high ash content coal from Singareni.

"The State was always willing to negotiate with the Centre for the rapid industrialisation of Andhra. But the real solution lay in the initiative of the State's people," Mr.Ranga Reddi declared.

Mr.Reddy listed among the concessions proposed for new industries:Subsidy in power rates; liberalisation of the loans provision; and the State's assistance in the purchase of land.

He said that two private sector fertilizer plants were programmed at Kothagudium and Visakhapatnam. The Centre would set up an intermediate drugs factory at Sanatnagar.

State-assisted industrial estates would spring up at Nizamabad, Eluru and Guntur, he said. A crore of rupees was earmarked for the development of leather industry.



LOCAL NEWS

A meeting of the Kothagudium Branch of the Indian Medical Association

By MR.S.V. RAMAN.

A clinical meeting of the Kothagudium Branch of the Indian Medical Association was held on February 17, 1961, at the Kothagudium Hospital, under the presidentship of Col.T.C.Ramachandani,F.R.C.S., Chief Surgeon and Medical Officer,S.C.Co., Ltd., Dr.P.S.Giri, President of the Andhra Pradesh Indian Medical Association was the chief guest.

Shri S.K.Nargundkar, General Manager, S.C.Co.,Ltd., Shri L.R.Sharma,Sr.Dy.General Manager, Shri B.G.Pradhan, Agent,

Rudrampur Division, Shri T.Prasad, Agent, Kothagudium Division, Shri T.C. Mehta, Safety Officer, Shri G.R.Kunchur, Principal, Govt. Mining Institute,Shri N.K.Mitra,Chief Engineer,attended on special invitation.

The talks on the subjects given were in simple non medical language so that lay people who were specially invited may understand the modern methods of treatment. All the subjects were dealt in detail, in a lucid manner, and kept up the audience's interest. The talks were further enlivened by the use of models, skiagrams, special surgical instruments etc., Patients who had derived benefit of the modern treatments at our Colliery hospital were also brought for demonstration.

Shri G.Venkatraman,Sr.Electrical Engineer, who was a patient till recently in our hospital gave a graphic discription of the experiences he had in his heart attack. Two blood donors, Shri Krishna, who had given 10 blood donations and Shri William Ross, who had given 15 blood donations at our hospital, gave their experiences in blood donation. They were awarded a medal each in recognition of their meritorious services.

Col.Ramchandani extending a hearty welcome to the gathering spoke on the necessity of medical practitioners joining the Indian Medical Association to protect their rights and for improving their lot.

Col.Ramchandani spoke on the treatment of fractures of femur(thigh bone). He demonstrated the treatment with skiagrams(X-ray pictures) and instruments used in the setting of the various fractures of femur.

Dr.S.V.Ghurye,M.D., spoke on medical emergencies in heart cases. Dr.Ghurye said to prevent heart conditions excessive indulgence in eating, smoking, drinking and sleeping should be avoided. Dr. H. M. Jagannatha Rao, M.B.B.S., D.O.M.S., spoke on emergency conditions arising from the diseases of heart, using a model of the human heart. Dr.Jagannatha Rao said that the incidence of diseases of heart may be due to greater awareness of it amongst doctors and also due to the greater longevity of the people as a result of constant war against infections and other diseases.

Dr.(Mrs.) L.Din,M.B.B.S., spoke on obstetrical (Mid-wifery) emergencies, the diagnosis and treatment of them.

Dr.S.Vaidyanathan,D.Sc.,M.B.B.S., spoke on blood transfusion. He said that with the exception of antibiotics, probably nothing in modern times has contributed so greatly to the saving of human life as blood transfusion. which has now been recognised as of vital necessity in the treatment of a large number of surgical and medical cases. He said that blood transfusion in cases of accidents resulting in bleeding and shock, can make all the difference between life and death.

Dr.Vaidyanathan said that donation of blood is practically painless and serves suffering humanity besides being beneficial to the human system of donor in many cases. He said that the loss of volume of blood due to donation is made up within 96 hours. He appealed to all voluntary organisations like the labour unions and scouts and guides and the general public to come forward to donate blood.

Dr.Giri thanking Col.Ramchandani for inviting him to attend the clinical meeting said that Kothagudium Branch of the Indian Medical Association had to be complimented for presenting the subjects in a lucid manner, using simple language so that lay people can easily understand. He said that holding of frequent clinical meetings afford busy

practitioners re-orientation on the various spheres of medicine and surgery which is rapidly advancing.

Dr.Giri spoke on the necessity of blood banks and the important role of blood transfusion in modern medicine and surgery.

Dr.Giri urged all qualified doctors to join the Indian Medical Association whose aim was to promote national health. A strong association can help the cause of the medical profession, he added.

Dr.Giri then answered some questions to topical subjects. Shri T. Prasad queried that since rickshaw pullers were found to be the majority of blood donors, if any research or investigation was done as to how much blood donation has benefitted or affected them.

Dr.Giri answered that in his Bezwada Blood Bank rickshaw pullers had indeed donated blood more than others. He said that rickshaw pulling was not a permanent vocation of the person engaged in it as the puller develops piles due to constant sitting on saddle and besides the effects of leading an erratic life.

He said he would write to the I.M.A. for conducting a research on the subject.

Shri S.V.Raman, put the question whether a person who gets an increase in weight after donating blood over 5 or 6 times, has a chance to get heart diseases. Dr.Giri replied that since the donor in his anxiety to make good the donation of blood, takes to eating more food than is necessary gets the over weight. Besides this the body mechanism always produced more blood than what was donated, he added. Any reasonable overweight need not produce heart diseases, he observed.

8 m.m. movie films taken by Col. Ramchandani at the Jaipur Surgeons' Conference, World Agricultural Fair, Delhi and illuminations at Bombay were shown.

Dinner followed the clinical meeting.

After dinner, Col.Ramchandani spoke on the history of surgery through the ages. The gathering drank a toast to all the past masters of surgery and medicine who by their indomitable spirit conquered every obstacle, even sacrificed their lives, to carry the torch of knowledge through all times and all countries, to bring alleviation and cure to the suffering humanity.

Col.Ramchandani presented the history of surgery with the aid of pictures and instruments designed by some of the great masters. He said that the present age was the golden age of surgery. Col. Ramchandani urged medical men not to forget the unforgettable past and the past masters who gave a glorious legacy with unconquerable spirit resulting in proud achievements for the eternal beauty of the art of science of surgery and medicine.

Shri Nargundkar thanked the local branch of the I.M.A. for inviting him to the meeting. He said that the Kothagudium branch had a bright future.

Dr.Giri thanking Col.Ramchandani and the members of the local branch for inviting him to attend the meeting said that it was the duty of the members of the medical profession to remember the past masters. He said that he will convey the happy memories of this meeting to other branches.

The meeting ended with a hearty vote of thanks proposed by Dr.B.Das, Secretary of the local association.

A 'Burrakatha' on Nagarjunasagar Project

'Burrakatha' on the Nagarjunasagar Project was arranged by the Ministry of Information and Broadcasting, Govt. of India at the S.E.R. Club on Feb:16. A large gathering attended the first class performance of Shri K.Banerjee, a noted artist of Andhra, ably accompanied by Shri M.Narsimhamurthy, a student of dance and music and Shri B. Narayana, B.A., from Hyderabad.

The trio with excellent combination narrated why the Nagarjunasagar project was taken up by the government and the various benefits of it, to the people, with pun-filled dialogues and meaningful songs and expressive action.

The artists were introduced to the audience by Shri Shyamal Rao, Five-Year Plan Publicity Officer.

Shri Ch.Kasiah, Social Educational Organiser of the Kothagudium Panchayat Samithi proposed a hearty vote of thanks.

Andhra Pradesh contingent for the 2nd All India Coalfields Sports Meet, Dhanbad

22 athletes, a 20-man band party of the Singareni Collieries, and a 5 man workers orchestra(Little & Party) left Bhadrachallam Road Railway Station on February 20 to Dhanbad to participate in the 2nd All India Coalfield Sports, to be held at Jharia on February 26. The team was given a warm send off at the railway station by colliery officials, sports fans, friends and relatives.

The athletic team captain is Shri S.Ramulu. Shri B.K.Ananda Rao, Secretary of the Work People's Sports and Games Association is the team Manager.

Shri Shyam Chandra, Welfare Inspector(Mines) is the officer-in-charge of the contingent.

'Gram Sahayak' training camp

A training camp for 'Gram Sahayaks' was held at Enkur village under the auspices of the Panchayat Samithi, Kothagudium, from 27-1-1961 to 29-1-1961.

Shri Panuganti Pitchiah, President, Panchayat Samithi, inaugurated the training camp. About 39 workers attended the training camp. Training was given in agriculture, animal husbandry, social education, people's health, co-operation, panchayat ruling etc., by competent persons.

An exhibition was arranged by the Samithi on public health, agriculture and animal husbandry. Villagers evinced deep interest in the exhibition. A 'Burrakatha' by students of Primary School, a drama on National Plans by Zilla Parishad High School, Kothagudium, variety entertainment by Zilla Parishad High School, Enkur, and film shows on agriculture were arranged during the training period.

Over 3000 villagers attended the final day function. Shri K.Subbiah, Panchayat President presided over and spoke on the occasion. Shri Kasiah, Social Educational Organiser, reviewed the three day activities.

Shri C.Sudershan Rao, Block Development Officer, distributed the prizes.

Engagements

Andhra Pradesh Coalfields Sub-Committee Meeting

A meeting of the Andhra Pradesh Coalfields Sub-Committee will be held at Hyderabad on February 28, 1961, under the chairmanship of Major Guruswamy, Labour Commissioner

Some of the important items on the agenda to be discussed are:-

1) Opening of new welfare centre at No.5 Incline.

2) Organising an excursion-cum-study tour for Andhra Pradesh Coalfields to tour South India.

3) Distribution of radios to schools.

Health Week 1961

The Health Week Exhibition 1961, will be held at Kothagudium Collieries from March 19, to 26.

35th Annual Meet of the Work Peopl's Sports and Games Association

The 35th Annual Meet of the Work People's Sports & Games Association will be held on March 12, 1961 at the stadium grounds.

Letters to the Editor

Dear Sir,

On behalf of the staff, workers and residents of Venkateshkhani and Anandkhani area and the Gautam Khani area, I wish to thank the Coal Mines Welfare Organisation through your esteemed columns for having arranged the screening of the Hindi picture 'Janam Janam ke Phere' on February 9, 1961.

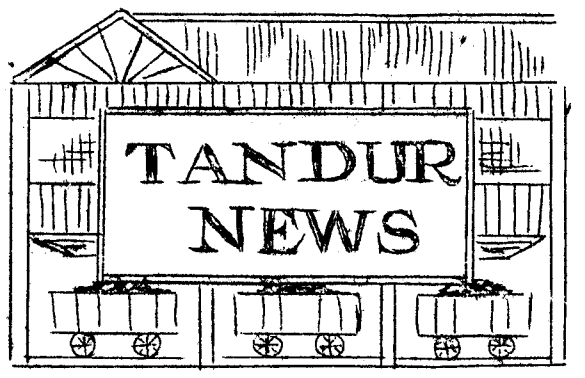
This is the first time a picture was shown by the Welfare Organisation in this remote area. There was a very good gathering of workers and their families, who appreciated very much this amenity.

I do hope that the Welfare Organisation will include this area in their regular picture screening programme.

Thanking you,

Yours faithfully,

Sd/-J.S.Avadhani,
Welfare Officer,
Venkateshkhani,No.7 Inc.



27th Annual Sports of the C.S.I. High School

The 27th Annual Sports of the C.S.I. High School, Tandur Collieries was held on February 8. Shri M.Vasudevan,Agent, Tandur Collieries, presided over the Meet. Smt.Vasudevan gave away the prizes. The children of the Primary School provided a guard of honour to the guests.

The sports meet began with flag hoisting by Shri Vasudevan. Athletes, girl cadets of the ACC, and school scouts, took part in a march past in which Shri Vasudevan took the salute. After march past, Shri Vasudevan lit the olympic torch. Master K.Venkati, a student, carried the torch.

The events were conducted in an orderly manner and provided plenty of fun and enjoyment to the spectators. The fast walking race of the guests, the tug-of-war between the teachers and students and Jilebi eating for the Kindergarten children evoked much interest.

At the end of the meet, the principal of the school welcoming the guests reviewed the progress made by the school during the current year.

(See Page 14)

CRICKET

(A shorth review by Shri S.A.H.Naqui)

The annual cricket fixture between the Kothagudium Cricket Club and the Tandur Cricket Club was played on February 5, at the stadium grounds. The match ended in a draw. Kothagudium Cricket Club scored 117 and 121. Tandur Cricket Club scored 107 and 85 for 5 wickets.

Tandur won the toss and opted to field. Raziuddin and Gururajan opened the KCC 1st innings, to the medium fast bowling of Shaffi and Amer Gupta. In the very 2nd ball of the first over Raziuddin survived a claim, the umpire giving the batsman the benefit of doubt.

The 1st wicket fell at 24, Gururajan being smartly run out. Narsimhamurthy joined Raziuddin and took the score to 36 when Raziuddin was clean bowled by Madhu after having scored 27 of the 36 runs on the score board. Then Sami joining Murthy played a confident game. Sami seemed well set, but was smartly bowled and caught by Subbaraju after scoring a quick 18 runs.

Naqui joined Murthy and when the score was 91 Murthy was out LBW to Amer Gupta. Murthy had scored a patient 11 runs. Bhashyam and Naqui then played a lively game. Bhashyam in a brief stay, sent Raju thrice to the ropes and trying to hook Naidu was caught by Shafi after scoring 22 runs. Naqui was out caught in the slips off Madhu. He had scored 17 runs. The entire team was out for 117 runs scored in two hours of game.

Madhu, Amer Gupta and Shaffi took 3, 2 & 2 wickets each for 15, 28, & 30 runs respectively.

Tandur opened their innings with Fazal and Shaffi to the medium fast bowling of Venugopal and Vijayaraghavan. Tandur started disastrously. Shaffi was out LBW to Venugopal when the score was 6. Subbarao came next and was out early having scored 7 runs. He was bowled by Venugopal. Naidu came next and started to play confidently. He scored 15 runs and was bowled by Venugopal.

Skipper Amer Gupta who came next was out caught by Raziuddin off Venugopal after scoring a run. A good partnership between Subbaraju and Madhu took the score to 76 when Raju was out. Azeez came next and made desparate hits to the boundary off Naqui. Naqui's 3 overs cost 29 runs for the KCC. Raghavan replacing Naqui clean bowled Azeez. The visitors were all out for 107 runs.

Venugopal, Vijayaraghavan and Gururajan took 5, 2, & 3 wickets respectively for 28, 36 & 12 runs.

Raziuddin and Gururajan opened the KCC 2nd innings to the bowling of Subbaraju and Shaffi, and started in a shaky manner. Gururajan was out LBW to Raju when the score was 7, having scored 3 runs. It fell on Sami and Raziuddin to play a cautious game and take the score to 72 when Raziuddin playing a defensive stroke was bowled by Naidu. He had scored 35 valuable runs. Naqui joined Sami and was out the next ball, bowled by Naidu. Venugopal joined Sami and made quick runs. Venugopal was out when the score was 107 being bowled by Subbaraju for 16 runs. Bhashyam the KCC captain joined Sami and played a cautious game. Sami was out bowled by Amer Gupta after making a useful 39 runs. After Sami wickets fell quickly and the entire team was out for 121 runs.

Amer Gupta took 5 wickets for 30 runs. The other wickets were shared by Naidu and Subbaraju who took two wickets each for 15 and 30 runs respectively.

Shri Ch.Punniah,Comes Secretary of the School read the physical education report for the year 1960-61. He said that physical education formed a vital part of the curriculam with four periods every week. He said that the school had done very well in the district tournaments held at Asifabad recently and the school owed very much to the management of Singareni Collieries particularly to the Agent,Tandur,for their success. He thanked the management for all the patronage to the school.

Shri Vasudevan speaking on the occasion appreciated the orderly manner in which the sports were conducted. He congratulated the school authorities for maintaining a good standard in both curricular and co-curricular activities and urged them to continue their efforts for attaining still better standards and run the school on sound lines. He said that intelligent and disciplined students are an asset to the nation.

The championship of the senior section was won by Md.Sayeed of Class X while Anwar Khan of Class VII won the junior championship. Fast walking race for guests was won by Shri J.D.Talati, Elec.Engineer and Shri P.T.Thomas,Welfare Officer, Shri N.Ramachandra Rao,Deputy Personnel Manager, won the 2nd prize. Smt.Parahjpe won the ladies ring throw event, while Smt.Talati and Smt.Vasudevan came 2nd and 3rd respectively.

Shri S.P.John,Headmaster,Primary Section proposed a hearty vote of thanks. A large gathering of parents, teachers, staff and workers attended the sports meet. Prominent among the officials were Shri P.S.Temurnikar,Agent,Mandamarri Division, Shri N.Ramachandra Rao,Dy.Personnel Manager,Shri R.D.Sharma,Manager, Morgans Pit,Rev.B.G.Prasada Rao,Superintendent,C.S.I., Belampalli. The guests were entertained to light refreshments.

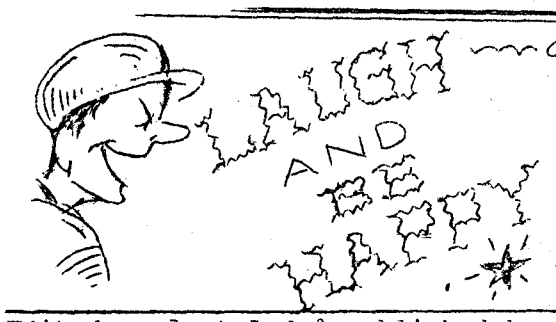
Set with 131 runs to score for a win, Tandur made 85 runs for 5 wickets at the close of the game. Fazal and Madhu opened the Tandur 2nd innings to the bowling of Venugopal and Vijayaraghavan. The opening pair played confidently. Fazal was out, caught by Sami off Venugopal scoring 25 runs. Subbaraju joined Madhu and when the score was 55 Madhu was out caught by wicket-keeper Chowdhary off Raghavan. Captain Amer Gupta joined Subbaraju and both carried the score to 78 when Subbaraju was out. Shaffi joined Amer Gupta and in the last over Gupta was out LBW to Venugopal after scoring 14 runs.

Venugopal took 3 wickets and Raghavan took 2 wickets.

At the end of the game three cheers were proposed by the respective team captains.

=:=:=:=



"I was sorry for your wife when she had a terrific bout of coughing in the temple this morning and everyone turned to look at her."

"You needn't worry about that. She was wearing a new Conjeevaram Saree."

OUR COLLIERY SONG

" Singareni Bhoomi "

TELUGU VERSION

Singareni boomi bangaru Shreni
Mapali kashtala Sanjeevi tharuvu
Jayamamma Jayamamma Jayamamma Jayamamma
O Singareni Bhoomi bangaru Shreni, bangaru Shrenee.

Bogguna udainche manikya deepika
Veladi Shramikula Udayadri tharaka
Ma brathuku batalo velugu jyotulu natee
Ee chimma cheekati chedaragottave thallee
Singareni Bhoomi bangaru Shreni, bangaru Shreni.

Kashtinchi panicheyu kanna biddalu,
nee kanna biddalu
Dari thennu leka kalatha chendarante
Lokamanthata krammu andhakaramu
Chaluva Choopulu choochi deevinchavamma
O Singareni bhoomi bangaru Shreni, bangaru Shrenee.

Kon 'alu selayellu Gowthamee theerala
Soga sulanoliketi Singaru Seema
Sangrama bhoomiga marabokamma
Shanti Sowbhagyalu vedajallavamma
Singareni bhoomi bangaru Shreni, bangaru Shreni.

Voka pettu debbaki voddantha ralali
Kollaluga ma boggu tabbulaku yekkali
Galagala birabira galagala troleelu birabira prakali
Deshadeshalella ma bogge velagali
Singareni bhoomi bangaru Shreni, bangaru Shrenee
Jayamamma Jayamamma Jayamamma Jayamamma.

ENGLISH TRANSLATION

Mother Singareni, Glory to you.
To us you are like life-giving 'Sanjeevi'.
We look to you at all times, Mother.
Victory to you, Mother Singareni!

You are our diamond torch.
For our toilers you are a morning star.
Pray, show us the way and dispel the darkness.
Forget not to bless us with your benign looks.

Let not your children get caught in the woods and grope in the darkness that may engulf the whole world.

The rich soil of Singareni with its green hills and running rivulets and with the holy waters of Goutami will keep us hopeful and bright. Mother, let not your land be the scene of fights. Spread only your charms of peace, plenty and prosperity.

Coal in abundance shall fill our baskets. Keep the tubs moving with your coal. With a blast your coal will fall in our tubs and our coal wagons will move fast to reach the ends of earth.

Victory to you, Mother Singareni!
